impact (E) is a function of the diameter of the asteroid/comet (d), the velocity of the impactor relative to Earth (v), and the density of the impactor (D). Equation (1) defines the kinetic energy release expressed in megatons of

Comet and Asteroid Threat Impact Analysis

Given the possible impact conditions in terms of impact speed and angle distributions (Figure SI1c&d), these parameters reflect a medium energy event for an asteroid of this size, because of the shallow impact angle and no casualties were reported for the Chelyabinsk event.
