Piping and Pipeline Calculations Manual - 1st Edition

All pipe systems are designed for the long term, but in plants and such, that pipe is just a portion of the project; in the pipelines, pipe and the pumping or compressor stations are the project. Determining the pipeline route is the job of surveyors and real estate people.

Technical Documents Our technical articles on pipe pressure drop calculations and flow rate calculations are provided for reference purposes, to guide the user in their understanding of the equations that are used in the engineering of, and design of pipe systems.

Technical Documents about Pipe Flow and Pressure Drops

The piping network calculations solve for pressure at nodes and then iteratively calculate the flow rates through the network as functions of pressure. A NODE UnitOp represents a point in the piping network where a change in pressure occurs due to elevation change, flow through a pipe, or flow through equipment that changes pressure (pump ...
