Laboratory Urinalysis and Hematology for the Small Animal Practitioner. by Bernard Feldman, Carolyn Sink March 2004 This guide to routinely performed laboratory procedures is essential for any veterinary practitioner or nurse learning to, or actually performing routine urinalysis and hematology laboratory procedures.

Laboratory Urinalysis and Hematology for the Small Animal

Abstract. This review examines the techniques currently available for diagnosing sickle cell disease (SCD) and analyzes the need for a rapid, low-cost diagnostic test for SCD within the broader context and social framework of healthcare systems in both industrialized and developing countries.

The Case for Rapid Diagnosis of Sickle Cell Disease: A

{{configCtrl2.info.metaDescription}} The following represent additions to UpToDate from the past six months that were considered by the editors and authors to be of particular interest.

UpToDate

Introduction. Heparin-induced thrombocytopenia (HIT) is a potentially life-threatening immune complication

that occurs after exposure to unfractionated heparin (UFH) or, less commonly, to low-molecular-weight heparins (LMWHs). 1 It is characterized by declining platelet counts beginning 5 to 14 days after heparin exposure and occurs in isolation (isolated HIT) or concurrently with new arterial ...
