This is a list of astronomical observatories ordered by name, along with initial dates of operation (where an accurate date is available) and location. The list also includes a final year of operation for many observatories that are no longer in operation. While other sciences, such as volcanology and meteorology, also use facilities called observatories for research and observations, this ...

If you look around in the literature and also in the internet, then the amateur self-made instruments (ATM) in the last 50 years has hardly developed. There are indeed bigger telescopes built today than 50 years ago, other materials are used, other motor-types and it has been added some electronic whistles, but basically come still the same old and supposedly proven designs back.
