

resistance welding fundamentals and pdf

Welding is a fabrication or sculptural process that joins materials, usually metals or thermoplastics, by using high heat to melt the parts together and allowing them to cool causing fusion. Welding is distinct from lower temperature metal-joining techniques such as brazing and soldering, which do not melt the base metal.. In addition to melting the base metal, a filler material is typically ...

Orbital welding first found use in the 1960s when the aero-space industry recognized the need for a superior joining technique for aircraft hydraulic lines.

Robot welding is the use of mechanized programmable tools (), which completely automate a welding process by both performing the weld and handling the part. Processes such as gas metal arc welding, while often automated, are not necessarily equivalent to robot welding, since a human operator sometimes prepares the materials to be welded. Robot welding is commonly used for resistance spot ...

Landscaping features may also be used effectively to thwart a vehicle from ramming into the building by creating an obstacle course. Monumental stairs, permanent planters against the building, statues, concrete seating, water features and other features can be effectively used to resist vehicular intrusion.
