

risk and uncertainty in pdf

Risk is the possibility of losing something of value. Values (such as physical health, social status, emotional well-being, or financial wealth) can be gained or lost when taking risk resulting from a given action or inaction, foreseen or unforeseen (planned or not planned). Risk can also be defined as the intentional interaction with uncertainty. ...

Risk - Wikipedia

Abstractâ€”This paper focuses on managerial decision making under risk and uncertainty. Since no one, so far, has studied managers' risk attitudes in parallel with their actual behavior when handling risky prospects the area still remains relatively
