The average household spends as much as \$500 per year on its water and sewer bill but could save about \$170 per year by retrofitting with water-efficient fixtures and incorporating water-saving practices. Let WaterSense® show you how to save water and your wallet. How much money you

Let WaterSense to save water H - US EPA

Home Water-Saving Methods EB0732 The earth's total water volume is constant none is gained or lost. Water goes through a continuous, hydrologic cycle of precipitation, infiltration, runoff, evaporation, and transpiration by plants. However, unequal distribution of rain at any given time or location can create shortages. Surface water

EB0732 Home Water-Saving Methods

Because water conservation is a good defense against shortages, it should happen all the time, not just when shortages occur. To begin conserving water, remember: 6Water is a highly valuable, limited resource. 6. Water costs a great deal in energy and money to pump, move and purify. 6Water consumption can be reduced significantly in the average home.
