Teens, Parents, and Teachers get the latest facts on how drugs affect the brain and body. Featuring videos, games, blog posts and more!

### **Teens - Drug Information | NIDA for Teens**

Many people don't understand why or how other people become addicted to drugs. They may mistakenly think that those who use drugs lack moral principles or willpower and that they could stop their drug use simply by choosing to. In reality, drug addiction is a complex disease, and quitting usually takes more than good intentions or a strong will.

Drug design, often referred to as rational drug design or simply rational design, is the inventive process of finding new medications based on the knowledge of a biological target. The drug is most commonly an organic small molecule that activates or inhibits the function of a biomolecule such as a protein, which in turn results in a therapeutic benefit to the patient.

### **Drug design - Wikipedia**

Pharmacology is the branch of biology concerned with the study of drug action, where a drug can be broadly

defined as any man-made, natural, or endogenous (from within the body) molecule which exerts a biochemical or physiological effect on the cell, tissue, organ, or organism (sometimes the word pharmacology is used as a term to encompass these endogenous and exogenous bioactive species).
