Scrum and Extreme Programming (XP) are definitely very aligned. In fact, if you walked in on a team doing one of these processes you might have hard time quickly deciding whether you had walked in on a Scrum team or an XP team.

Differences Between Scrum and Extreme Programming

Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, empirical knowledge, and continual improvement, and it encourages rapid and flexible response to change.

Most modern business application development projects use object technology such as Java or C# to build the application software and relational databases to store the data. This isn't to say that you don't have other options, there are many applications built with procedural languages such as COBOL and many systems will use object databases or XML databases to store data.
