A content delivery network or content distribution network (CDN) is a geographically distributed network of proxy servers and their data centers. The goal is to provide high availability and high performance by distributing the service spatially relative to end-users. CDNs serve a large portion of the Internet content today, including web objects (text, graphics and scripts), downloadable ...

A market order instructs Fidelity to buy or sell securities for your account at the next available price. It remains in effect only for the day, and usually results in the prompt purchase or sale of all the shares of stock, options contracts, or bonds in question, as long as the security is actively traded and market conditions permit.
