Segmented Turning, A Good Start

Open any book on segmented turning and you're likely to see at least one chapter filled with numbers, angles, and formulas. But you don't have to be a mathematician to calculate the angles, lengths, widths and depths of the building blocks that make up a segmented glue-up.

Calculate The Dimensions Of Segmented Turning Pieces

I started making segmented bowls about 9 months ago. I used Titebond 3 because it was in my opinion the best wood glue since Titebond 2. I like its lower viscosity, longer set-up time and great strength.

Wood putty, also called plastic wood, is a substance used to fill imperfections, such as nail holes, in wood prior to finishing. It is often composed of wood dust combined with a binder that dries and a diluent (thinner), and, sometimes, pigment. Pore fillers used for large flat surfaces such as floors or table tops generally contain silica instead of or in addition to wood dust.
