Sex change is a process by which a person or animal changes sex – that is, by which female sexual characteristics are substituted for male ones, or vice versa. Sex change may occur naturally, as in the case of the sequential hermaphroditism observed in some species. Most commonly, however, the term is used for sex reassignment therapy, including sex reassignment surgery, carried out on humans.

Transgender is an umbrella term used to describe people whose gender identity (sense of themselves as male or female) or gender expression differs from socially constructed norms associated with their birth sex. This includes androgynous, bigendered and gender queer people, who tend to see traditional concepts of gender as restrictive.
