In physics, action is an attribute of the dynamics of a physical system from which the equations of motion of the system can be derived. It is a mathematical functional which takes the trajectory, also called path or history, of the system as its argument and has a real number as its result. Generally, the action takes different values for different paths. ...

Action (physics) - Wikipedia

Usage overview. An example of a simple type system is that of the C language. The portions of a C program are the function definitions. One function is invoked by another function.

Abstract. In this work, a novel time-delayed polynomial grey prediction model with the fractional order accumulation is put forward, which is abbreviated as TDPFOGM(1,1), based on the new grey system theory to predict the small sample in comparison with the existing forecasting models.

Time-Delayed Polynomial Grey System Model with the
