A Session Border Controller (SBC) is a network element deployed to protect SIP based Voice over Internet Protocol (VoIP) networks.. Early deployments of SBCs were focused on the borders between two service provider networks in a peering environment. This role has now expanded to include significant deployments between a service provider's access network and a backbone network to provide ...

I've been asked to include SPI (and I2C – more on that soon) support for the Raspberry Pi in my wiringPi! However because it's hard to anticipate exactly what SPI devices you may connect up, it's hard to provide something specific, so what I've done is provide some "helper" functions in a library and a guide on how to use SPI and what it's all about!
