The State of Food Insecurity in the World Economic growth is necessary but not sufficient to accelerate reduction of hunger and malnutrition 2012

### **The state of food insecurity in the world - 2012**

More than 15 million U.S. children live in "food-insecure" households "having limited access to adequate food and nutrition due to cost, proximity and/or other resources. 1 Low income individuals are at increased risk for both food insecurity and obesity. Lower-income individuals often have more limited access to affordable, healthier food options "living in neighborhoods with fewer ...

The United States Department of Agriculture defines food insecurity as "limited or uncertain availability of nutritionally adequate and safe foods or limited or uncertain ability to acquire acceptable foods in socially acceptable ways." Food security is defined by the USDA as "access by all people at all times to enough food for an active, healthy life."

On June 21, the House passed the Agriculture Committee's (the Committee) farm bill, which includes nutrition provisions that would increase food insecurity and hardship. By adopting harmful amendments during floor debate in May, the House made the bill that ultimately passed even worse than the version the Committee originally introduced (see Appendix I).

A famine is a widespread scarcity of food, caused by several factors including war, inflation, crop failure, population imbalance, or government policies. This phenomenon is usually accompanied or followed by regional malnutrition, starvation, epidemic, and increased mortality. Every inhabited continent in the world has experienced a period of famine throughout history.
