Introduction. CSHALS is the premier annual event focused on the practical application of Semantic Web and other semantic technologies to problems in the Life Sciences, including pharmaceutical industry and related areas, such as hospitals/healthcare institutions and academic research labs.

A Data Science Big Mechanism for DARPA - Semanticcommunity.info

Records management, also known as records and information management, is an organizational function devoted to the management of information in an organization throughout its life cycle, from the time of creation or inscription to its eventual disposition. This includes identifying, classifying, storing, securing, retrieving, tracking and destroying or permanently preserving records.

Records management - Wikipedia

Every business is basically a system of complicated processes that work together to produce a product or a service. The processes include the staff, the equipment, the communication, the linkages and everything else that helps to ensure business operations continue as normal.
