Universal Design for Learning (UDL) provides the opportunity for all students to access, participate in, and progress in the general-education curriculum by reducing barriers to instruction. Learn more about how UDL offers options for how information is presented, how students respond or demonstrate their knowledge and skills, and how students are engaged in learning.

Inclusion of people with disabilities into everyday activities involves practices and policies designed to identify and remove barriers such as physical, communication, and attitudinal, that hamper individualsâ€™ ability to have full participation in society, the same as people without disabilities. Inclusion involves:

The universal motor is a type of electric motor that can operate on either AC or DC power and uses an electromagnet as its stator to create its magnetic field. It is a commutated series-wound motor where the stator's field coils are connected in series with the rotor windings through a commutator. It is often referred to as an AC series motor. The universal motor is very similar to a DC series ...
