A Report on Psychology & Architecture By W. Bro. Victor G

Psychology is the science of behavior and mind, including conscious and unconscious phenomena, as well as feeling and thought. It is an academic discipline of immense scope and diverse interests that, when taken together, seek an understanding of the emergent properties of brains, and all the variety of epiphenomena they manifest. As a social science it aims to understand individuals and groups ...

Working memory is a cognitive system with a limited capacity that is responsible for temporarily holding information available for processing. Working memory is important for reasoning and the guidance of decision-making and behavior. Working memory is often used synonymously with short-term memory, but some theorists consider the two forms of memory distinct, assuming that working memory ...

Cognitive Distortions: When Your Brain Lies to You (+ PDF)

There is much discussion about what young people should do in their childhood and youth to prepare them for success in adulthood. Once the desired end results or the prerequisites for success have determined, it is necessary to determine the means or the conditions by which those can be brought about.

Educational Psychology Interactive: Why Study?

Abraham Maslow and Humanistic Psychology. Faculty: Dr. Michael Brock Description: This tutorial is designed to acquaint the student with Abraham Maslow and the fundamentals of his thought. Rather than settle for merely a secondary-source summary of who he was and what he thought, this course will concentrate on Maslow's life and, by using a classic text, will explore the essentials of his ...
